

How Do You Stop Metal Theft?

Recycling Operations Manager (ROM) Software Helps You Be in Compliance With Your Local Police Department

Pictures of Material

ROM's camera system can take an unlimited number of pictures per transaction, including gross weights, tare weights and who got paid. Pictures are displayed right on the screen and can be printed or emailed directly from the system.

(Actual Picture)

Direct Scale Weight Capture

ROM is connected directly to your scales, ensuring that all weights entered are accurate. The system tracks manually entered weights to deter and monitor for employee theft.

Driver's License Scanner

When Licenses are scanned, OCR Software transfers the information into the ROM database in seconds. The image of the Driver's License is stored with the customer's record and can be printed or faxed directly from the system.

Electronic Signature Capture

Capture a signature for every transaction. Secure Signature Technology with Biometric Information for legally binding Signatures. System stores both an image of the signature and Biometric Information such as the speed of pen strokes and order strokes were made in.

Fingerprint Scanner

The ultimate in identification. Scan and store fingerprints with each transaction in seconds, satisfying even the most stringent Police Department requirement.

Leadsonline Integration

ROM electronically sends purchasing information to Leadsonline, saving you and your local police countless hours of paperwork and time. Have your employees spend their time making you money, not reports.
